Reflux Desktop Client. Update v3.9.0.5

Version Update Importance: **LOW PRIORITY**

New Features:

1. Choose your sound file!
1. We listened to you and you can now pick your new order audio alerts. There are 6 to choose from, ranging from 1 second, to 12 seconds. This was upgraded as some of you expressed concern that the default noise was too short or not loud enough.
1. To change the file, you need to click on the File menu, then Settings!

2. New sounds files will be added monthly, and soon you will be able to import your own mp3 files!

GUI User Interface Upgrades:

1. A new settings menu has been added, at the moment its only use is to choose the new order alerts, however we plan on giving you lots of options to give you the most customised experience.

Bug Fixes:

1. Improved stability

This is a free upgrade and will roll out automatically next time you start Reflux. Stay updated

with our new features by subscribing to the RSS feed.

Note: After the update, remember to select your printer again or your orders may not print. From Reflux, go to "File" =>"Change Printer" then select your printer from the list and click "save"
