

Reflux Desktop Client. Update v3.9.0.11

Version Update Importance: **HIGH PRIORITY**

1. THIS WAS AN IMPORTANT UPDATE TO IMPROVE STABILITY
2. Fixed: More Bugs on the login form! Now you won't get an "Unhandled Exception" message
3. Fixed: First-time synchronisation bugs
4. Fixed: Overall stability
5. Fixed: Removed some code that was sometimes shown on the printouts (like <sup> and)
6. Improved: Login times now reduced. Also the start up speed of the application is now much quicker.

This is a free upgrade and will roll out automatically next time you start Reflux. Stay updated with our new features by subscribing to the RSS feed.

Note: After the update, remember to select your printer again or your orders may not print. From Reflux, go to "File" =>"Change Printer" then select your printer from the list and click "save"
